V-GROOVE COMBINATION WRENCH SETS IN EVA FOAM

 **CHROME VANADIUM STEEL**
 **MEETS ANSI STANDARDS**

**NEW AND
IMPROVED!**

High carbon steel has been replaced with chrome vanadium steel giving the user a more durable, high quality wrench

Chamfered end allows for fast and easy guidance onto fasteners

Radius corner design improves the grip on fasteners

15° offset head provides greater access into tight work areas

Sizes are stamped on in 4 locations on both sides of the wrench for fast and easy identification

Chrome plating for strength and the prevention of rust, corrosion and deformation

15° angled head provides greater access into tight work areas

Radius V-Groove design on open end creates anti-slip and prevents rounding of the fastener

EVA foam storage trays give you fast access to tools and instant identification when a tool is missing. The unique SUNEX "S" pattern design provides solid retention and simplifies removal.
