SUNEX® TOOLS

CUSTOMIZABLE, SECURE ORGANIZATION

FOR TECHNICIANS, MECHANICS & OTHER PROFESSIONALS

- **Customizable Organization -** Adjustable dividers lock into up to 23 positions in the full tray and 3 quarter tray orientations and lock into up to 9 positions in the half tray. Molded finger tabs allow fast removal and reconfiguration for efficient organization of hardware and small components.
- **Stackable Locking System -** Heavy-duty metal latches allow trays to stack and lock together for organized storage and secure transport between the shop, tool cart, or job sites.
- **Modular Fit Design -** Full, half, and quarter size trays nest and lock together inside larger trays, creating layered organization for fasteners, terminals, O rings, washers, and precision components.
- **Non-Slip Base -** Rugged non-marring rubber bottom grips uneven surfaces to prevent sliding, keeping trays stable and secure when working on vehicles, tool carts, or industrial workspaces.
