6603AJ

3 TON ALUMINUM JACK

Thick frame side plates and a robust lift arm not only augments its strength but also enhances chassis torsion control, ensuring stability and durability that withstands the rigors of intensive usage

Navigating tight spaces is a breeze with our jack's ball bearing mounted rear swivel caster wheels

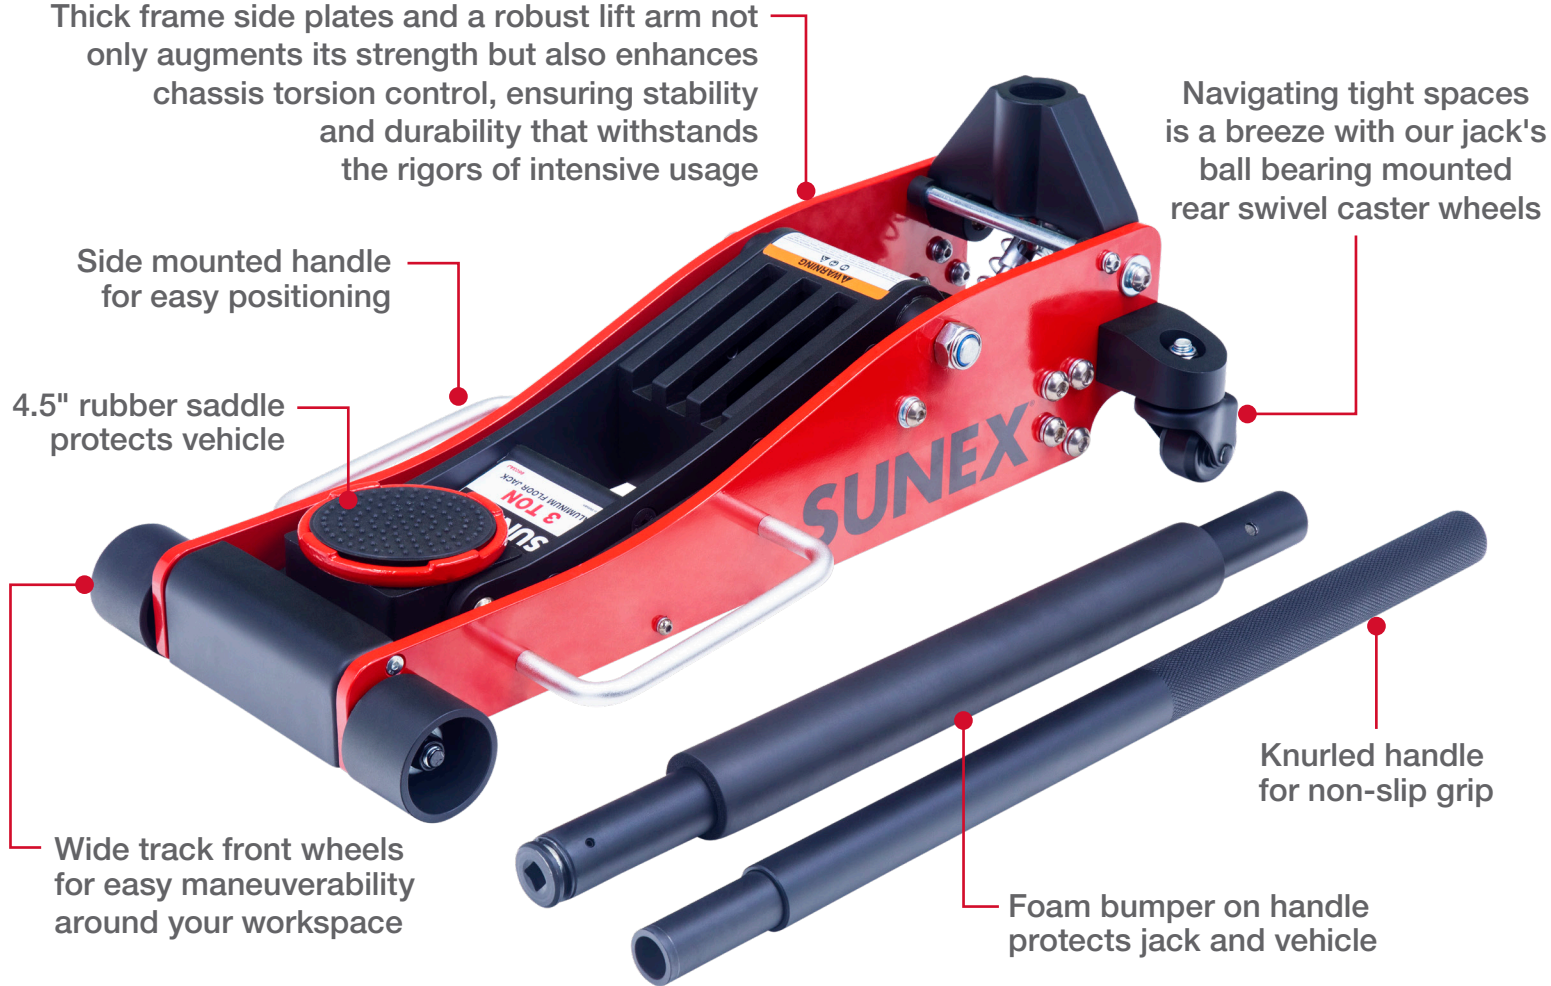

Side mounted handle for easy positioning

4.5" rubber saddle protects vehicle

Wide track front wheels for easy maneuverability around your workspace

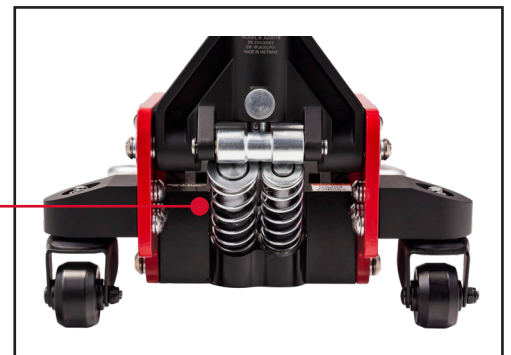

Knurled handle for non-slip grip

Foam bumper on handle protects jack and vehicle

RAPID RISE[™]

Our innovative Rapid Rise[™] hydraulic power unit boasts dual pump pistons, effortlessly propelling the lift arm to your load in record time
